## (54) METHOD AND APPARATUS FOR IMAGE PROCESSING, AND STORAGE MEDIUM

### (57)Abstract

**PROBLEM TO BE SOLVED:** To eliminate such a problem that a quantity of related information is reduced and a desired tile cannot be easily provided from among a plurality of tiles obtained by dividing an image.

**SOLUTION:** From a server machine having a plurality of the tiles obtained by dividing an image, and image files each of which stores related information of each tile, an image consisting of at least one of those tiles and related information are received. The related information of the received image is taken over to an image of a high resolution of the received image. Using the taken-over related information, a tile is selectively received from among a plurality of the tiles.

### LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
